

VAJEN & NEW,

ILLUSTRATED AND DESCRIPTIVE,

CATALOGUE.

CUTLERY,
PLATED WARE,

TOOLS,
SPECIALTIES.

HARDWARE,

64 EAST WASHINGTON ST., INDIANAPOLIS, IND.

To Our Patrons :

Desiring to extend our trade and to better serve our customers, we have issued this ILLUSTRATED AND DESCRIPTIVE CATALOGUE, which we trust will prove a valuable aid in making selections for MAIL ORDERS, to which we give the most careful attention ; making prices as low as though purchased in person.

Owing to the constant changes in lists and prices on so large a line of goods, we have omitted lists on all but standard goods and prefer to quote net prices or discounts upon application, giving our customers the benefit of the lowest prices at the time of purchase.

Be particular to give Catalogue page and number of articles desired.

State whether goods are to be shipped by Express or Freight.

Package charged at net cost.

With a grateful acknowledgement of the many favors our trade have so generously bestowed upon us, and which have enabled us to largely increase our business, we ask you to bear in mind that Vajen & New stand at the head to serve and to please. We hope by a careful consideration of your wants to merit and maintain a continuance of your patronage.

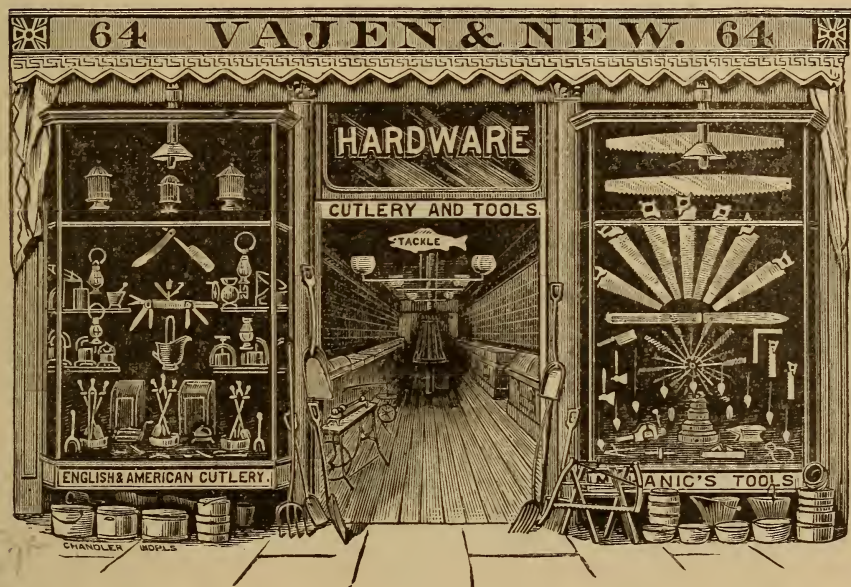

Very truly,

VAJEN & NEW.

WILLIS C. VAJEN.
GEO. W. NEW.

SPRING SCREEN DOOR HINGES.

STANDARD SPRING HINGES.

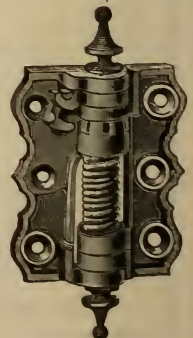

- No. 1, Surface.3x3
- No. 3, Mortise.3x3
- No. 5, Double Acting,

It will always be our aim to furnish the best hinge of this kind to be had for the money, and enable our customers to compete with other hinges on sale by other merchants which might be much inferior.

DEVORE'S SPRING HINGE.

The most practical low-priced Spring Hinge in the market. Simplest in construction, and **Most Durable**. Has uniform tension, holds the door firmly when closed, and when the door opens 130°, the action of the spring reverses, and holds the door open.

Size.....3x3 inch.

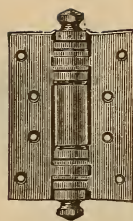

SPRING HINGES.

GEM SPRING HINGES.

Double Acting.

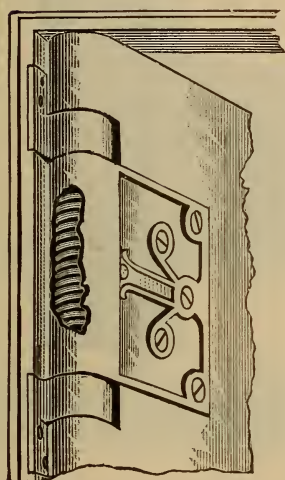

Length.	For Doors.	Single Acting.	Double Acting.
3½ inch...	¾ to 1½ inch...	No. 63.....	No. 83.....

10 " ...1¾	to 2½ " ...	" 69.....	" 89.....
12 " ...2	to 3 " ...	" 70.....	" 90.....

Single Acting.

The above numbers are for Japanned Hinges. They can also be furnished in Copper Bronzed, Real Bronze, or Polished Brass.

THE CHAMPION DOUBLE ACTING SPRING HINGE.

Nos.....	35	40	50
For Doors.....	7/8 to 1½	1½ to 1¾	1½ to 1¾ in. thick.
Japanned.....

We claim for this Hinge the following merits, which make it superior to any other in the market:

- 1st. The spring is self-adjusting, and will hold its tension much longer than others.
- 2d. It is as strong as any butt, and will hold the heaviest door in its proper place without sagging.
- 3d. It is made of but three parts, thus being very simple and impossible to get out of order.
- 4th. It is both right and left hand, and single as well as double acting, the double acting being furnished at about the price of single acting of other manufacture.
- 5th. It is less cumbersome, and makes a more handsome finish when on a door.

MALLEABLE IRON, BRASS SPRINGS.

WINDOW SPRING BOLTS.

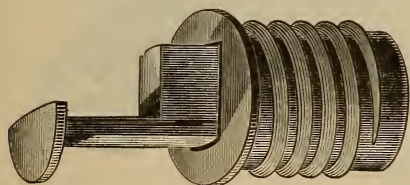

- No. 15, Copper Bronzed.
 No. 20, Silver Capped
 No. 37, Wrought Iron, Tinned.

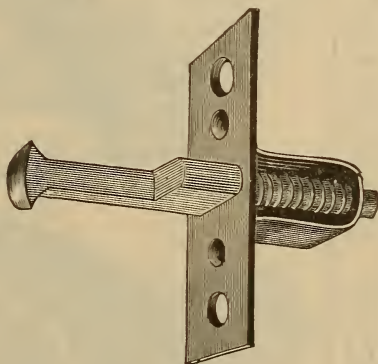

- No. 101½, Copper Bronzed.

The case of this bolt is provided with a screw-thread, and when screwed into the sash, it is there to stay. The butt-end is flattened to fit a wrench, which will be found in every box containing half gross of bolts. By placing this wrench in a brace, it will be very easy to screw the bolt into the sash.

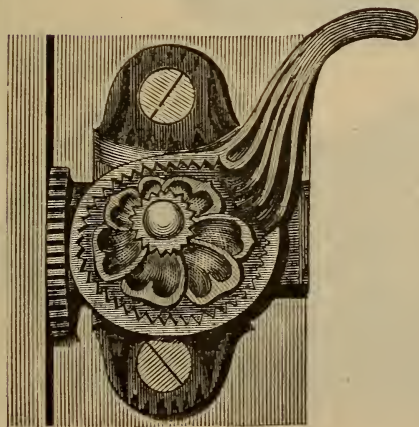

BABCOCK'S WINDOW SPRINGS.

- No. 3, Brass Bolt.

DOOR SPRINGS.

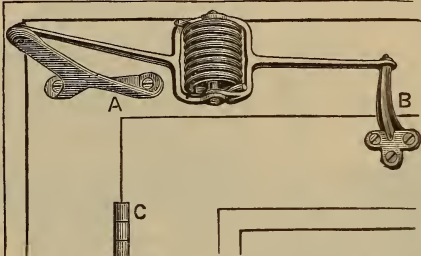

ELLIOTT PNEUMATIC DOOR CHECK.

Compact, Neat and Ornamental.

It is the most compact, symmetrical and efficient Door Check and Spring that has ever been put upon the market. Does not project perpendicularly and awkwardly ten or twelve inches into the room. Does not require the use of a spirit level or an experienced mechanic in attaching, but is so simple in construction, that any one can easily and properly adjust it. Does not require defacement of the casing or moulding in its application. Does not make a noise in closing the door, but is absolutely noiseless in its operation.

Try the Elliott Spring, if you would have the best.

No. 1, for doors not exceeding 3½ feet wide by 3 inches thick
No. 2, " " " " 3 " " 2 " "
No. 3, " " " " 2½ " " 1½ " "
No. 4, " light doors in private residences.

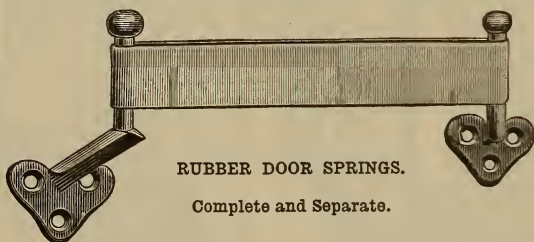

HERCULES REVERSE DOOR SPRING
AND RETAINER.

Holds the door open as well as shut, and allows the door to stand at a right angle without the aid of any catch.

No. 1, for large doors
No. 2, " " "
No. 3, for medium doors
No. 4, " " "
No. 5, for screen doors

This Spring can be applied lower on the door where the door is not required to be thrown back, and Spring taken off and put on at pleasure.

BELT HOOKS AND STUDS.

BLAKE'S BELT STUDS.

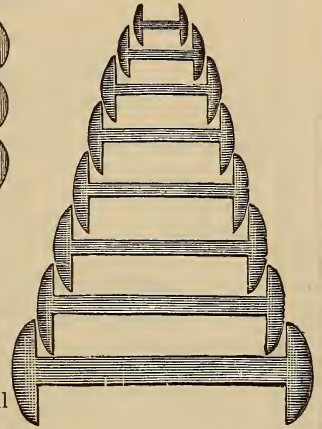

For Rubber or Leather Belts.

These Studs are designed as a substitute for Lace Leather and Belt Hooks. They entirely obviate the great trouble of Belts tearing at the lacing. Belts once fastened with the studs will last as long as the Belt.

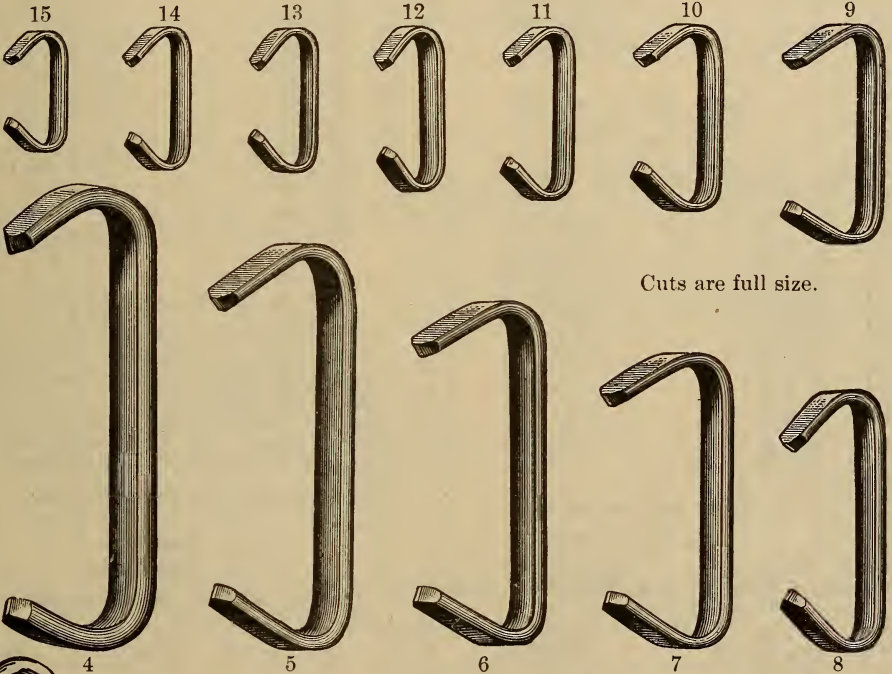

Nos. 00 . . 0 . . 1 . . . 2 . . . 3 . . . 4 . . . 5 . . . 6 . . . 100

No. 6 is the smallest size.

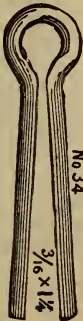

We also have suitable tools for inserting the stud. Small size for Leather, large size for Rubber Belts.

POINTED BELT HOOKS.

Cuts are full size.

Nos. 2 to 5, 100 in a Box. . . . 6 to 8, 200. . . . 9 to 10, 300. . . . 11 to 15, 500. . . .

BARB FENCE WIRE AND FENCING.

BARB FENCE WIRE.

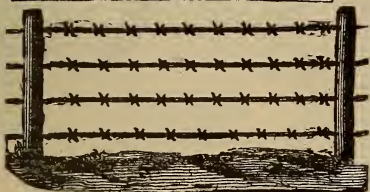

The days of wood fencing will soon be with the past. Iron and steel are rapidly superceding. It is only within a few years that Barb Wire Fence has crept into general use. It is now well known that for economy, durability and strength, it can not be excelled. Is everlasting in its character, at less than half the cost of the less durable wood.

Strong winds do not affect them, nor snows break them down.

Prairie fires will not burn them.

They are easily and cheaply put up.

Galvanized

FENCE STAPLES.

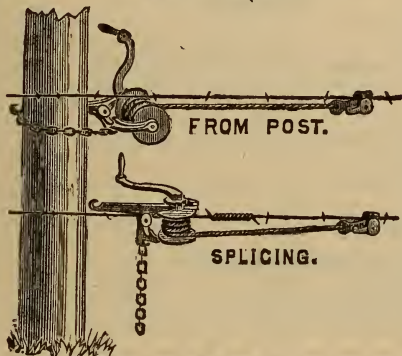

Self-Color, 1¼ inch, Per lb

Galvanized, 1¼ inch, " "

LITTLE GIANT BARB FENCE STRETCHER.

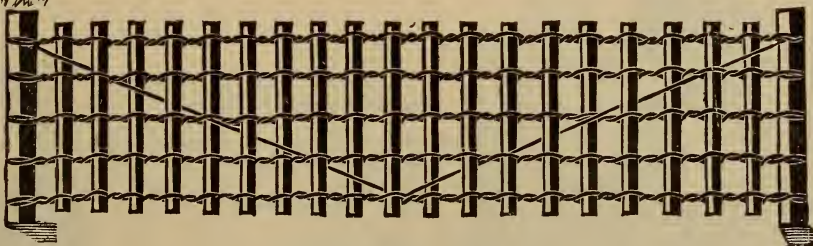

Price

This is the only stretcher made that the latch will adjust itself to the ratchet, either side of the post or at either end of the wire, or either side up. Used for stretching and splicing.

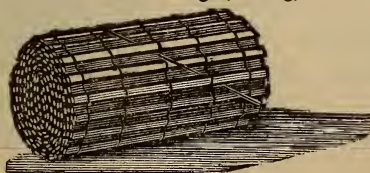

For raising hogs, cattle or any other weight it is indispensable.

This stretcher being fastened to the post, it is not necessary to hold it up with one hand and undertake to turn the windlass with the other.

SHELLABERGER FENCE.

Light, Strong, Durable, Cheap. Perfectly Tight. Visible as Plank.

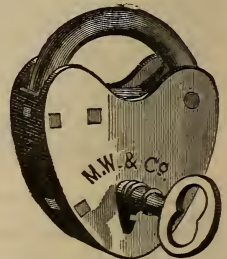

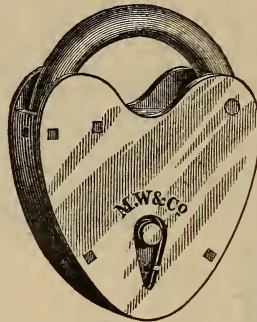

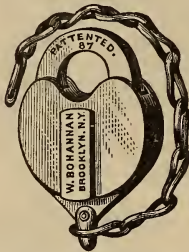

The above cut represents the combination fence, composed of five two-strand cables of the best annealed Bessemer steel wire, firmly interwoven with slats at a uniform distance of 2½ to 3 inches apart; the slats are of first quality; thus we have a fence that will turn all kinds of stock, from the smallest pig to the meanest mule, without endangering the life of any.

It is five times as strong as barb wire, will last as

long, visible as plank, and at much less expense.

Price, per rod

CHAINS.

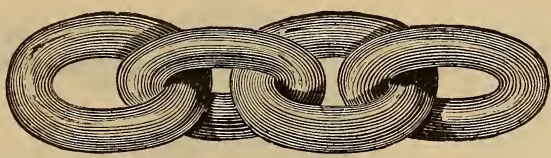

Until recently we have depended almost entirely upon the manufacturers in Europe for this class of goods. We are happy to state, that the large sums of money annually sent, from our shores in the payment for the same, is rapidly decreasing. Our own capital and labor having recently been largely invested in this branch of Manufacture, producing chains superior in every respect to those of foreign make.

FIELD AND LAWN ROLLER.

This Roller has two rolls, 20 inches in diameter, 12 in. face, each with weights which hang suspended in the Roller.

Every lawn should be rolled in the spring before cutting with a Lawn Mower.

LAWN MOWERS.

127

THE "BUCKEYE" JUNIOR
LAWN MOWER

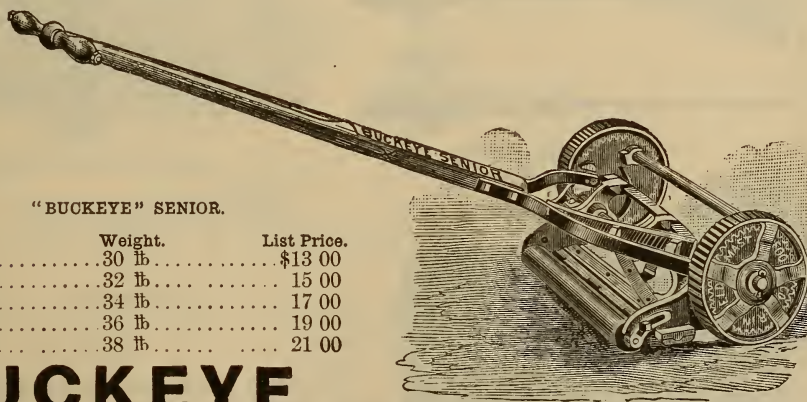

Size.	Weight.	List Price.
10 Inch	30 lb.	\$11 00
12 Inch	32 lb.	13 00
14 Inch	34 lb.	15 00

Its center cut enables it to be used on uneven surfaces, cutting over knolls and ridges in the lawn, close up to walks and down terraces.

The height at which handle is carried does not effect height of cut. Can be used by a boy or girl as well as a man.

By placing the improved positive noiseless clutch without springs or pins in the ground wheel instead of in the reel pinion, the gears remain stationary when Mower is drawn backward, thus saving nearly one-half the wear of gears.

It is a perfect LITTLE JEWEL, very compact, thoroughly made of best material and beautifully finished.

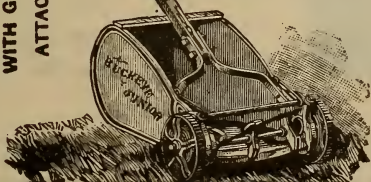

"BUCKEYE" SENIOR.

Size.	Weight.	List Price.
10 Inch	30 lb.	\$13 00
12 Inch	32 lb.	15 00
14 Inch	34 lb.	17 00
16 Inch	36 lb.	19 00
18 Inch	38 lb.	21 00

BUCKEYE
JUNIOR and SENIOR
Lawn Mower.

WITH GRASS-BOX
ATTACHMENT.

With independent internal gears separate from the ground wheels, perfectly encased to prevent gravel, dirt or grass from being carried into them by the ground wheels. Has an adjustable roller running the entire width of the machine, to regulate the height of cut. It has adjustable handles, and adapts itself to the irregularities of the surface. Ease of work and not liable to get out of order. It is a perfect LITTLE BEAUTY, being compact, thoroughly made of the best material and beautifully finished. It is the most perfect Lawn Mower in the market.

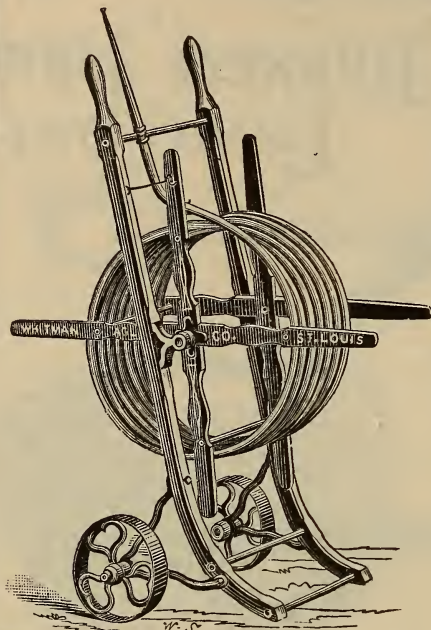

Grass Box Attachment for either Senior or Junior Mower

HOSE REELS AND NOZZLES.

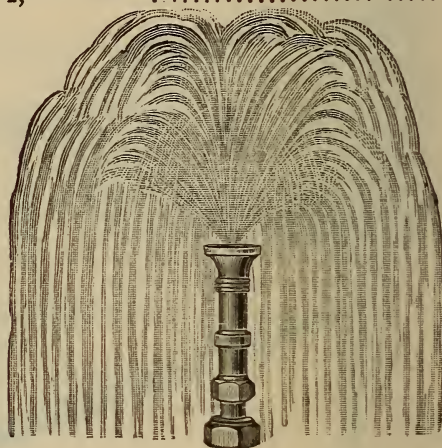

HOSE REELS.

For Lawns and Pavement.

These Reels are latest improved; bent side pieces. They stand much firmer upon the ground than any other. No castings that are liable to break. The Reel is very large, enabling Hose to be used when partly wound up, protecting it from injury and allowing water to pass through freely.

All the latest and best Garden Tools kept in stock.

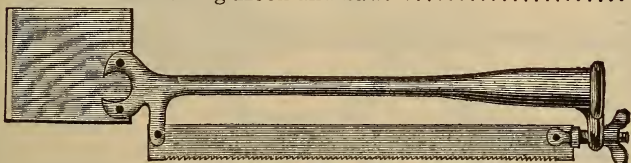

PRUNING SAWS AND SHEARS.

131

The Knife and Saw are both made of the best cast steel, and can be used with or without a pole. The saw can be detached when the hook alone is to be used, and attached again for use on limbs too large for the cutter. It combines two useful tools in one, without increase of cost to the consumer.

Little Giant Pruning Hook and Saw.

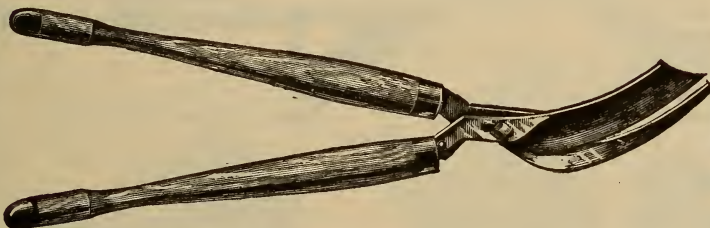

PRUNING SAW AND CHISEL.

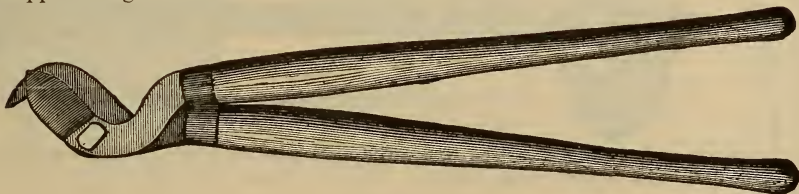

Cast Steel Saw and Chisel, Malleable Iron Shank.....

Feet, 8.... 10....

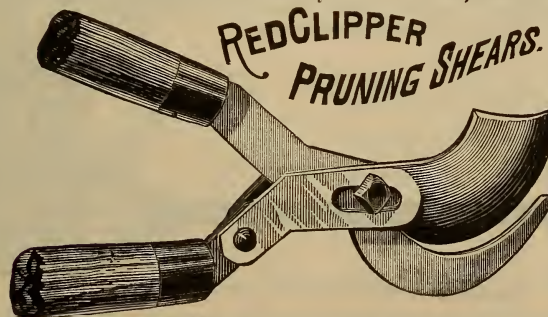

Red Clipper Hedge Shears.....

Buckeye Pruning Shears.....

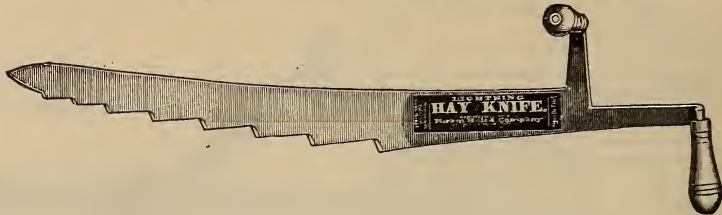

These justly celebrated Pruners are receiving praise wherever they are in use. They are to supercede all others; light, to take the place of the common hand shear, and strong enough to be used instead of the heavy, cumbersome large ones. A superior tool for tree and shrub trimming, It is needed by every one who has no more than a garden to keep in trim, while in an orchard it is an indispensable article, it being of such weight and size that it does not weary one to use it, and will do any work required of a pruner.

Price

These Shears have a hinge movement. The Shank is attached on the opposite side of the hook, operating as a lever to the blade, thereby preventing any springing of the blade, which has proved so objectionable in other shears. When the Shears need grinding, by simply removing one bolt, the knife can be turned around so as to be ground on an ordinary grindstone.

HAY KNIVES AND POST-HOLE DIGGERS.

THE "LIGHTNING" HAY KNIVES.

For cutting fine feed from bale; to cut down mow or stack; to cut corn stalks for feed; to cut peat, or for ditching in marshes, it is not excelled.
 Price

HEATH'S UPRIGHT HAY KNIVES.

The spear-cutting edge, the comparative ease in working, and the direct pressure downwards, enables one to cut loose hay or straw easier than with any other knife.

STEEL ALLOY CHURCH AND SCHOOL BELLS--Gold Bronzed.

These Bells are cast from an alloy of cast steel and crystal metal, and can be relied on under all circumstances and in all seasons. We have five sizes, as follows:

No.	Diam. Bell.	Weight Com.	Price.
4½	21 in.	150 lb.
5	24 in.	225 lb.
6	26 in.	325 lb.
7	32 in.	600 lb.
8	36 in.	850 lb.

The style of mounting these Bells is represented in the cut, and includes Wood Frame, Iron Wheel, and for Nos. 7 and 8, Tolling Hammers without extra charge.

These Bells are offered to the trade as the best of their class. They are uniform in shape, and

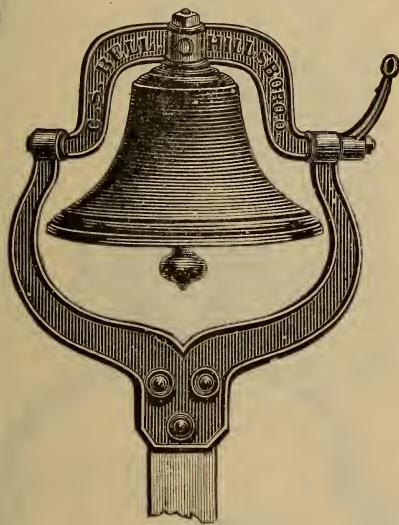

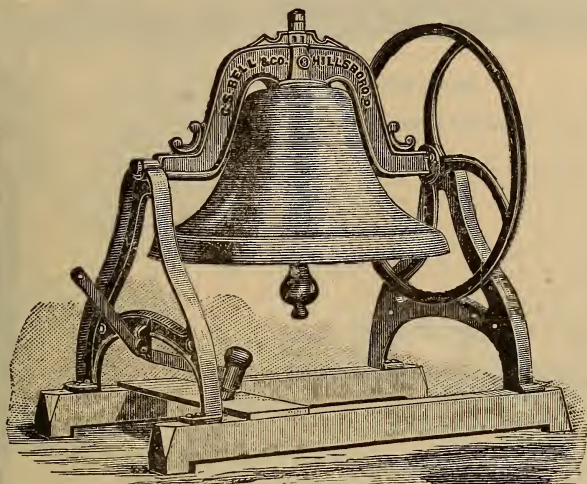

finished in a first-class manner. The mountings are graceful in appearance and perfectly adapted to the duty they are to perform. The quality of material used is the best, and only experienced workmen employed in their production.

FARM BELLS--Richly Bronzed.

We have four sizes of Farm Bells, as follows:

No.	Diameter of Bell.	Weight Complete.	Price.
1	15 in.	40 lb.
2	17 in.	50 lb.
3	19 in.	75 lb.
4	21 in.	100 lb.

The style of mountings used for these Bells is represented in the cut. No. 4 Bell can be furnished with upright for platform or belfry if desired.

153

BRIGHTON SIDE COFFEE MILLS.

Nos. 101 202 303 404

BRIGHTON CRACKER AND BREAD MILL.

Price.

A Family Mill for grinding Bread, Crackers, Coffee, Spice, etc., and what every good housekeeper should have.

This Mill will fill a want long felt by every cook and housekeeper. It does away with that laborious and unsatisfactory method of crushing crackers with the rolling-pin; it enables the use of scraps and dry pieces of bread, which otherwise would be lost. It will grind fine or coarse, as desired.

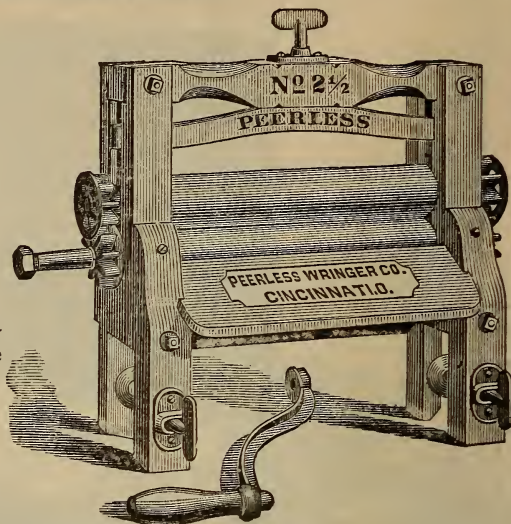

As a Coffee Mill, it has no equal, and boarding-house keepers will find it admirably suited to their wants for this purpose.

CLOTHES WRINGERS.

PEERLESS.

- No. 2½, Rolls 10 x 1½ in., Family Size
- No. 3, Rolls 11 x 1½ in.
- No. 4, " 12 x 2 in.
- No. 5, " 14 x 2¼ in.

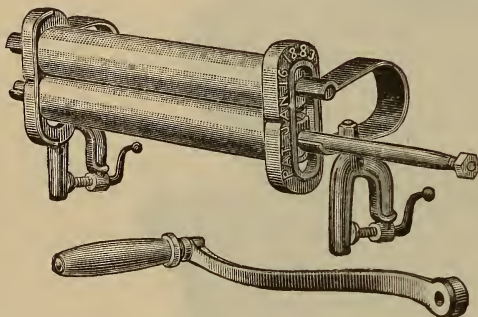

The above Wringers will fit stationary or round tubs, thick or thin, and is the best known Wringer made.

No. 99.

Iron Frame, Improvement on Eureka

By turning handle backwards once around, the rolls can be separated, thereby relieving the pressure when not in use.

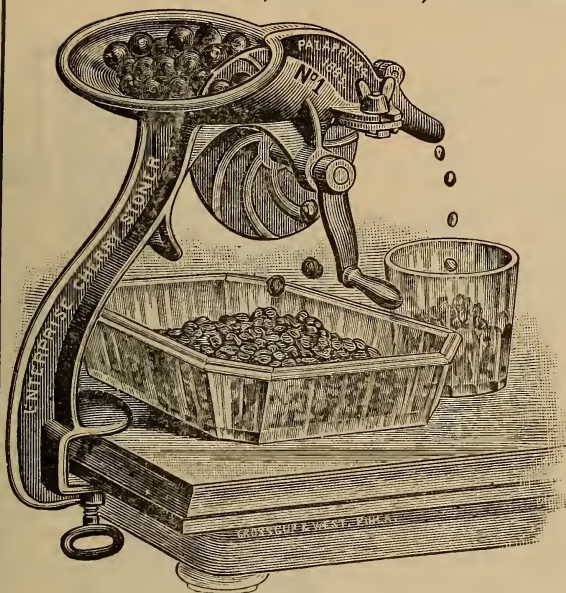

EXCELSIOR.—With Folding Bench.

No. A, Family Size, Rolls, 10 x 1¼ in.

The operator can stand erect while Wringing, with one hand free to spread and guide the clothes, instead of being required to steady the Wringer or tub. When not in use the Wringer can be readily detached from the bench, the latter folded, and both stored away in less space than is required for the usual "old chair."

Our Wringers all have the best rubber rolls, and guaranteed to give the best of satisfaction.

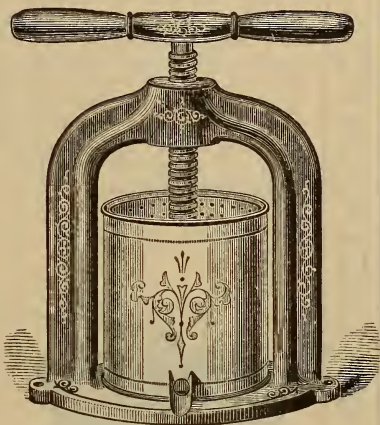

ENTERPRISE CHERRY STONER.

No. 1.....

A new Cherry Stoner, which we particularly recommend to those desiring rapid work. It can be adjusted by thumb screws to adapt it to the different sizes of cherry stones. It will be found very rapid in its work, and a decided improvement over others of this class.

ENTERPRISE TINCTURE PRESS.

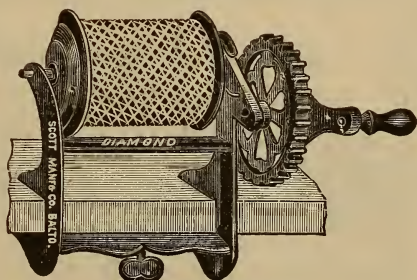

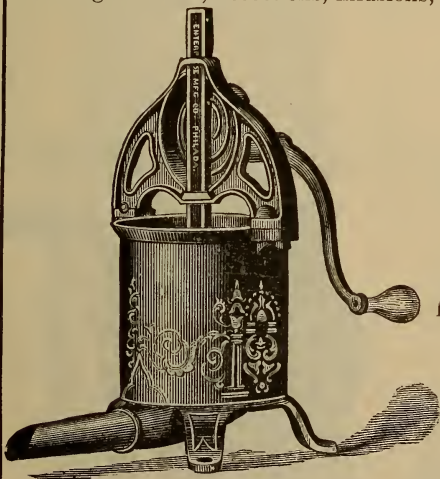

Quarts 1.... 2.... 4.... 8....

A Druggist's Tincture Press, which is very strong and durable, as well as reasonable in price. Druggists will find this Press suitable for their wants, in making tinctures, decoctions, infusions, &c.

ENTERPRISE COMBINED SAUSAGE STUFFER,
Fruit, Lard and Jelly Press.

Power Freezers, 25 and 50 qts. furnished to order. Packing Cans and Tubs furnished to order.

The White Mountain Freezer has three motions. The center beater shaft has lifter arms, or floats, which mix the cream in the middle, turning opposite the outside beater. The outside beater scrapes the cream off the can, and has floats extending to inside beater, which throws cream to center, when it is thrown back by the inside beater to the outside, the can at the same time turning in an opposite direction, making three simultaneous motions, thus mixing the cream thoroughly and evenly. These beaters are of malleable iron and coated with pure block tin. The White Mountain Freezer has no large surfaces of zinc in contact with the cream, but tin instead. Families especially should look to this, as Freezers put away damp will, when dry, show oxide of zinc, which is a well-known poison.

THE CLIMAX FILTER.

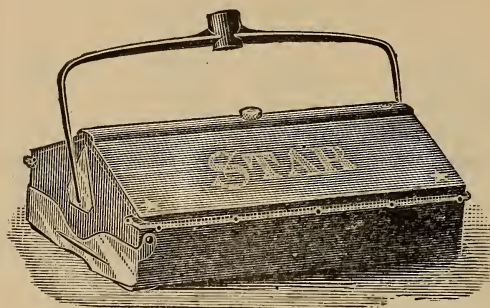

With Solid Iron Reservoir, Lined with White Porcelain.

No.....	52	53	54	55
Reservoir	2	3	4½	6½ Gals.
Price				

A Filter for the million. The filtering medium is enclosed in a substantial shell of galvanized iron, fitted to the top of a porcelain-lined, cast-iron reservoir. This reservoir does not pretend to be a cooler, but still may be found a valuable substitute for such.

The No. 53 is the best family size, and always kept in stock.

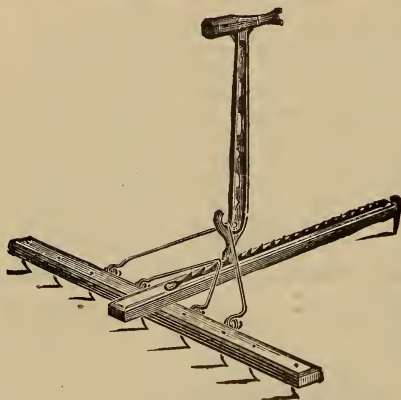

CARPET SWEEPERS AND STRETCHERS.

STAR CARPET SWEEPER.

Price

This Sweeper sweeps close to the wall and base board, and also has rubber cushions around the box to keep the Sweeper from marking the furniture; the rubber is vulcanized on the wheels, merits which no other Sweeper possesses. The brush can be raised or lowered on either side. The only one which has the same mechanical movement as used in sweeping with a broom. We warrant it to take up what a broom will leave, even to wet sand.

EXCELSIOR CARPET STRETCHER,

And Tack Hammer Combined.

Price

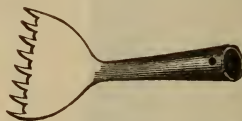

The most compact and complete machine ever offered to families for putting down carpet. Saves Labor, Time, Temper, Backache and Profanity.

Its merits are proved. It is needed. Every family should have one. It does its work effectually, handling the most obdurate carpet like a charm.

METAL POLISH, CUTLERY ROLLS AND SHOW CASES.

STANDARD METAL POLISH AND RUST ERASER.

Price

The only preparation that will erase rust or varnish from any metal of an originally bright surface, and (if the face is not eaten off) polish as bright as ever.

Apply it on your machinery, edge tools, base-burner stoves, cutlery, gun or rifle barrels, silver, tin and table ware, nickel-plated show cases; in fact, anything that needs cleaning, polishing and preserving.

CUTLERY ROLLS.

For Table and Pocket Knives, Shears, Razors, &c.

Can furnish the above in Chamois Lined, Cashmere Lined, or Canton Flannel Lined, to order.....

Can furnish any of the above styles, from 2 to 12 feet.

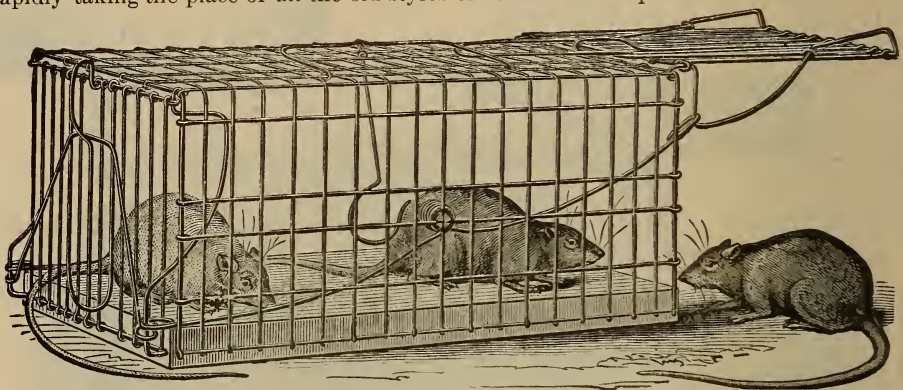

RAT TRAPS.

NEW CRIMPED RAT TRAP.

No. 18, Tinned Wire, Wood Bottom

This Trap has been received with great favor by the trade, and by its superior merit is rapidly taking the place of all the old styles of round Rat Traps.

PERFECT LOCK RAT TRAPS.

No. 14, Retinned after Making, 2 Doors

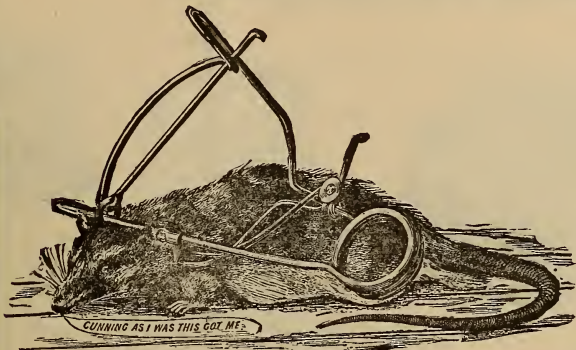

This is the best, and only perfect Lock Trap now in the market. The lock is so made that the moment the rat touches the bait both doors instantly close, and the rat is securely caged. The springs lock the door firmly at each side as well as at the bottom, and when the trap is sprung, the rat can not get out, even though he turns the trap over in his efforts to escape.

JENNE'S MAGNET SELF-SETTING TRAPS.

Price.....

This Trap is guaranteed to be a success, if the directions are followed. There are no pains nor expense spared to make every trap as near perfect as possible. All of the different traps, with few exceptions, hold the few victims they catch, either dead or alive, for the inspection of all the rest. The balance, of course, can't be caught, and get credit for being very smart. The fact is, a drowned rat tells no tales. Any person with one of these traps and an abundance of good bait, managed discreetly, can catch every rat about any building or premises.

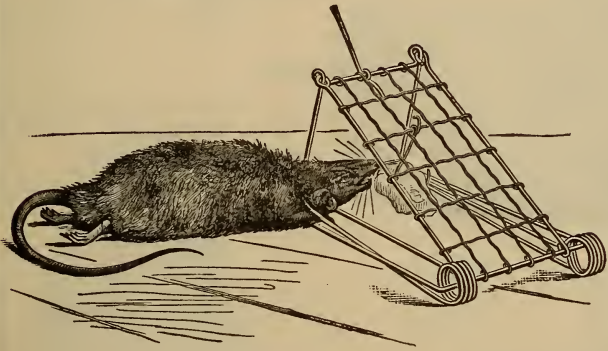

CERTAIN DEATH.

Price.....

Requires no bait.

This is a new trap, and meets with ready sale.

POCKET KNIVES

IN

MANY STYLES AND FINISHES.

Iron, Brass or

German Silver Lined,

Plain or Polished.

We have a line of KNIVES made especially to order,
from Wordlow's Best English Cast Steel, branded with our
own name on the blades. There is none better in the market, and
we warrant every blade to be first-class.

This, the most important branch of our business, seems to be treated most mildly,
and yet it has received the most consideration. To attempt to illustrate the many differ-
ent patterns of Pocket Knives carried by us, would simply be impossible, and would
require a book several times larger than our entire Catalogue.

FLY BOOKS.—For Fly and Snell Hooks.

Ordinary Medium Fine

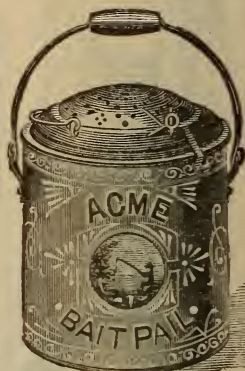

A good assortment in stock. Also Rubber and Britannia Drinking Cups, Fish Scales, Fly Nets, Landing Nets.

The inside pail can be removed and placed in the water the same as a "fish car," thus keeping the bait alive for an indefinite time. The pan which fits in the inside pail can be raised and lowered, thus affording an easy selection of bait without wetting the hand. The bait is kept alive during transportation (the critical time) by the continuous flowing of the water through the perforations, thus causing a never-failing supply of fresh air. Price

TOOL DEPARTMENT.

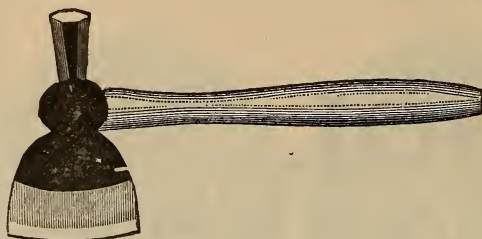

This Catalogue contains a carefully selected list of fine Tools in nearly every branch. We are constantly adding to our stock New Tools. Should you not find what you want illustrated, ask or write for it.

Any Tool or Bill of Tools ordered from this department will be forwarded by return express, when possible, at the very Lowest Price. A reduction of 5% will be allowed on all mail orders from a distance for Tools, where the bill amounts to \$100.00 or more. This is done to encourage mechanics to club together and order their Tools at one time.

In ordering give NUMBER, PAGE and a full DESCRIPTION of the article wanted, and give full instructions how to ship.

SAW VISES AND BORING MACHINES.

241

WENTWORTH'S PAT. SAW VISE.

It has a flexible rubber cushion or muffler between the jaws, which prevents any vibration, and renders saw filing noiseless. We guarantee it to make no more noise than filing on a solid piece of iron.

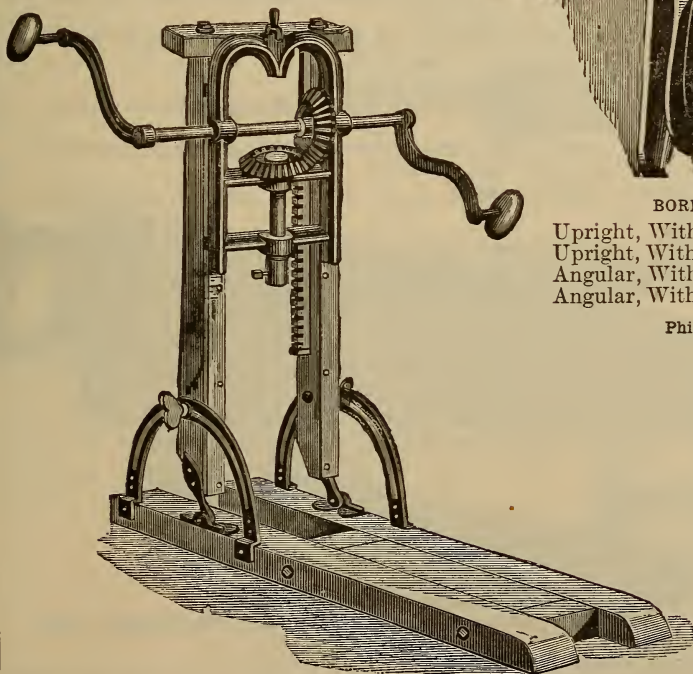

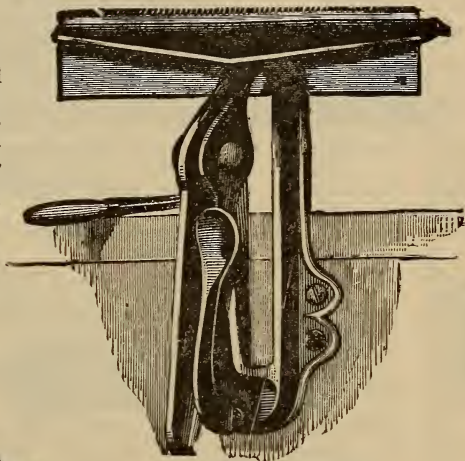

- No. 1, Jaws, 10 in. long
- No. 2, Jaws, 12 in. long

As harness clamp the No. 2 Vise is useful in stitching leather, repairing harness, etc.

STEARNS' PAT. SAW VISE.

- Nos 0 1 2 3

The jaws of these Vises are so constructed as to prevent vibration of the saw in filing, thereby lessening the noise, and causing a great saving of files. The jaws are planed to match perfectly. The No. 3 Vise has a screw clamp for attaching it to work bench, and a cam or lever for holding it in any position.

BORING MACHINES.

- Upright, Without Augers
- Upright, With "
- Angular, Without "
- Angular, With "

Phillips' Patent Boring Machine.

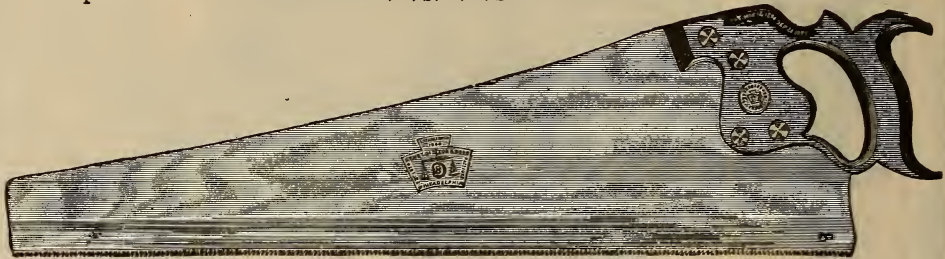

These machines are self-withdrawing. The depth of hole is set before boring by means of the movable collar, and without watching to see when the proper depth is reached, or stopping the boring movement, the auger returns of itself and is ready for another hole.

Angular, with Augers,

.....

The Numbers above are the Saleable Numbers.

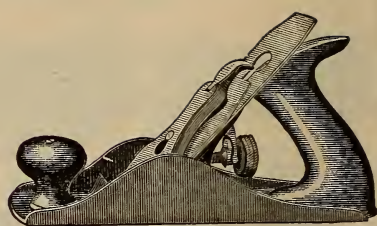

Ogees, Rev. Ogees, Ovolos, Nosing, Raising, Reeding, Sash and Moulding Planes.

PLANES.

FANCY WOOD AND IRON PLANES.

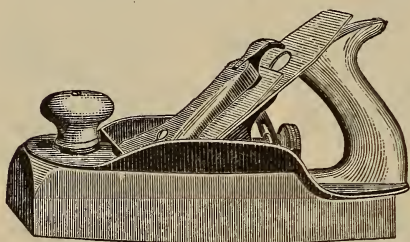

- No. 5 Jack Plane, 14 in., 2 in. Cutter.
- No. 6 Fore Plane, 18 in., $2\frac{3}{8}$ in. Cutter
- No. 8 Jointer Plane, 24 in., $2\frac{3}{8}$ in. Cutter

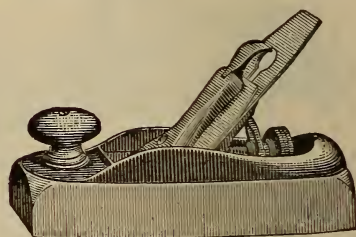

- No. 3 Smooth Plane, 8 in. long, $1\frac{3}{4}$ in. Cutter.

Each Plane is Thoroughly Tested at the Factory and put in Perfect Working Order.

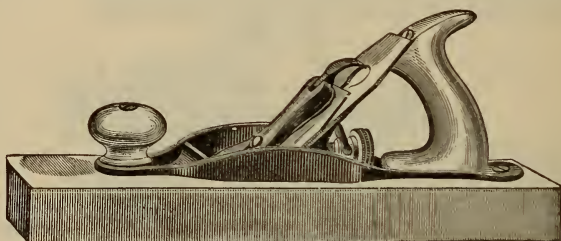

- No. 35 Handled Smooth 9 in., 2 in. Cutter.
- No. 36 Handled Smooth 10 in., $2\frac{3}{8}$ in. Cutter

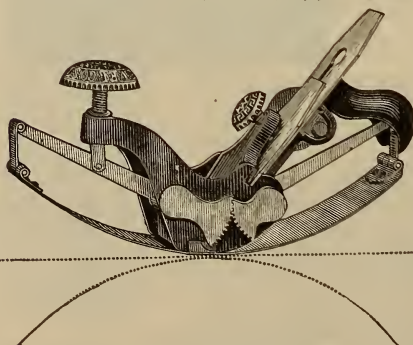

- No. 22 Smooth Plane 8 in., $1\frac{3}{4}$ in. Cutter
- No. 23 Smooth Plane 9 in., $1\frac{3}{4}$ in. Cutter.
- No. 24 Smooth Plane 8 in., 2 in. Cutter

For Beauty of Style and Finish, they are Unequaled, and the Superior Methods for Adjusting them readily in all their parts. render them Economical to the Owner.

- No. 26 Jack Plane 15 in., 2 in. Cutter.
- No. 27 Jack Plane 15 in., $2\frac{1}{8}$ in. Cutter
- No. 29 Fore Plane 20 in., $2\frac{3}{8}$ in. Cutter
- No. 31 Jointer Plane, 24 in., $2\frac{3}{8}$ in. Cutter
- No. 32 Jointer Plane, 26 in., $2\frac{5}{8}$ in. Cutter

No. 113.

Bailey Plane Bits.

- $1\frac{3}{4}$ in . . . 2 in . . . $2\frac{1}{8}$ in . . . $2\frac{3}{8}$ in . . . $2\frac{5}{8}$ in . . .

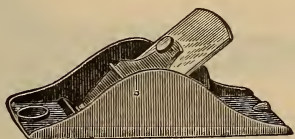

Improved Patent Adjustable Circular Plane.

No. 113, Adjustable Circular, $1\frac{3}{4}$ inch Cutter
This Plane has a Flexible Steel Face, which can be easily shaped to any required arc, either concave or convex, by turning the Knob on the front of the plane. By the peculiar construction of the plane, a smaller arc, either concave or convex, can be obtained than by any other similar tool.

PLANES AND TRAMMEL POINTS.

BLOCK PLANERS.

HOLLOW AUGERS AND POINTERS.

STEARNS' PATENT HOLLOW AUGERS.

The best single size Hollow Auger in the market, and the only one in which a stop, operated upon a graduated scale, regulates the length of tenon.

Size	5-16	$\frac{3}{8}$	7-16	$\frac{1}{2}$	9-16	$\frac{5}{8}$	$\frac{3}{4}$	$\frac{7}{8}$	1 in.
No. 6 Without Bits									

STEARNS' PATENT ADJUSTABLE HOLLOW AUGERS.

This justly popular Auger is made of steel, wrought and malleable iron, leaving no chance for breaking. The pivoted jaws, which move uniformly and center perfectly, are provided with a graduated scale or rule, by which the size of the tenon is regulated. To secure required length of tenon, a movable stop is operated upon a graduated scale, with rulings to sixteenths, adjustable from $\frac{1}{4}$ to $1\frac{1}{4}$ inches.

No. 3									
-----------------	--	--	--	--	--	--	--	--	--

STEARNS' PATENT SPOKE POINTERS.

Have the knife held with two screws, and cut a much longer taper than the old style pointer. Will leave the spoke the exact size required for Hollow Auger.

PATENT

REVERSIBLE PLUMB BOB.

Patented November 14, 1882.

This new and perfect Plumb Bob, designed to overcome all the disadvantages of other Plumb Bobs, is capable of being adjusted to any and all the forms required by the Millwright, Mechanic and Civil Engineer, has no equal. It has the only proper shape for a Bob, having a hole extending entirely through it, with a reversible, well-tempered Steel Point and Screw Cap, which, being interchangeable, enables the Bob to be suspended in the several positions as shown in cuts. The hole in the center of the Bob affording protection for the point when not in use. By filing the shoulder the Bob can always be adjusted and made true. The Plumb Bob is made of brass and nickel-plated, furnishing as pretty and as valuable a tool as there is in the market. We recommend it in preference to all other combination bobs, and guarantee it to give perfect satisfaction. In four sizes. 1 Pound..... \$2; 2 Pound.....\$2.50; 3 Pound.....\$3; 4 Pound..... \$4.

This cut represents Cooke's Dividers with Calliper Points, which can be substituted for Steel Points, and will answer for Wood Turners and Machinists.

Cooke's Patent Extension Dividers and Callipers.

These Dividers answer every purpose of the Common Dividers, and give the advantage of an extension point, use of a pen or pencil, and use of Calliper Points. Adapted to the requirements of Architects, Machinists, Pattern Makers, Wheelwrights, Stair-Builders, Carpenters, in fact there is hardly a trade where they will not be in demand as soon as the goods are known.

The above list applies to American Files only.

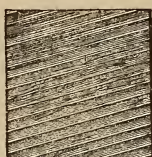

Our American Files are the best in the market, and each one fully guaranteed to do its work well. The above assortment includes the Files and Rasps in general use. For Special Work, we can furnish any other kind or size required.

REMARKS ON USING FILES.

A new file should be used with a light pressure on the work till the needle-like points of the teeth are worn away; after this, a much heavier pressure may be used with less danger of breaking off the teeth at their base. Many new files are violently diminished half their efficiency by a few careless strokes when first applied to the work.

Steel Sockets for Taper Shank Drills and Straight Shank Machine Bits.

This figure displays three vertical sections of fossilized plant stems, likely from the same geological formation. Each section shows a distinct internal structure. The leftmost section has a relatively smooth outer surface and a central pith. The middle section shows a more complex internal structure with a central pith and a surrounding ring of vascular tissue. The rightmost section shows a highly textured outer surface and a central pith. The sections are arranged vertically, showing the internal structure of the stems.

HUNTINGTON'S PATENT EMERY WHEEL AGGRAVATOR.—Steel Cutter.

For Shaping, Sharpening and Removing Glaze from Emery Wheels.

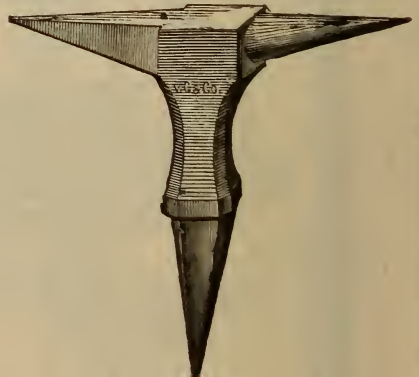

The cut shows the form and construction of the tool. Its head contains a combination of a sharp-toothed cutter and discs set at right and left declination, thus producing a combination of cross-cutting and scraping effects, at the same time, that rapidly cuts the emery wheel, while the cutters are not perceptibly worn by contact with it.

TINNERS' STOVES

Nicely Japanned, Double Damper, Base Burning, Reversible Flue, causing the fire to burn downward directly on the soldering coppers. This Stove or Fire Pot is provided with a grate and an ash pit. The top and bottom plate of the Stove, together with the spout piece, are of cast iron, and the body or jacket of sheet iron. A Tinner can not afford to make his own stove when he can buy this one, having all the new improvements, considering the low price at which it is sold.

These are considered the best Instruments in use for the purpose.

A detailed black and white illustration of various tools and equipment. The items are arranged in a grid-like fashion. In the top row, there is a large rectangular brush, a bucket, a smaller brush, and a long-handled tool. The second row features a small brush, two small hand tools, and a larger brush. The third row includes a small brush, a wheelbarrow, a small hammer, a small circular tool, a small bucket, and a small cup. The bottom row shows a large wheelbarrow, a small wheelbarrow, a large shovel, a medium shovel, and a small shovel. The tools are depicted with fine lines and shading to show their texture and form.

VAJEN'S CASH REGISTER.

NICKEL-PLATED ON BRONZED METAL.

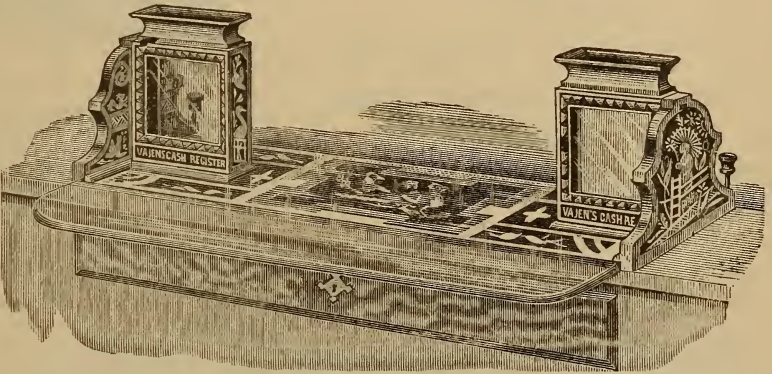

This Register consists of a transparent box, or receiving chamber with glass sides, having a slanting bottom with mechanism for working the trap. The party reporting the sale hands the money to the cashier and drops the sales ticket into the Register (the position of it being on the front edge of the desk), the check alights upon the trap, in position, on a line with the cashier's vision, the inscription upon the ticket rendered quite distinct by the light from the opposite side. The change is made from the cash drawer, after which the cashier touches the button which springs the trap, precipitating the ticket into the drawer beneath, where it remains undisturbed until the time for balancing the cash. The cash being registered by two parties, each a check upon the other, without the necessity of any verbal communication, the possibility of an error is overcome. At all times the MONEY must correspond with the several amounts on the tickets in the drawer, and the cash balance to a cent, overcoming the many embarrassments often experienced by those having the cash in charge, saving time, labor and expense, no printed checks being required. PRICE OF THE REGISTER is \$15.00.

Every merchant and cashier will appreciate the value of this appliance, so simple, overcoming the complications unavoidable in other cash systems. The cashier need be no longer detained after business hours, searching for the error that forbids a balance in his cash account. This desirable condition of affairs is absolutely assured by the use of VAJEN'S CASH REGISTER, which has proven most valuable to the many merchants having them now in use. Nearly every cash desk will have space enough between the cash drawer and front of desk to admit of a drawer from the front of the desk sufficiently large to hold the checks.

THIS REGISTER

Is mounted upon plate glass, with ground edges, over a piece of in-laid wood scroll work, in different colors, to be placed on the desk, furnishing as pretty a cash receiver as one could well imagine. It has unequal, and no addition to one's business will afford as much satisfaction. It must be seen to be appreciated. On this, as well as other styles, we guarantee perfect satisfaction.

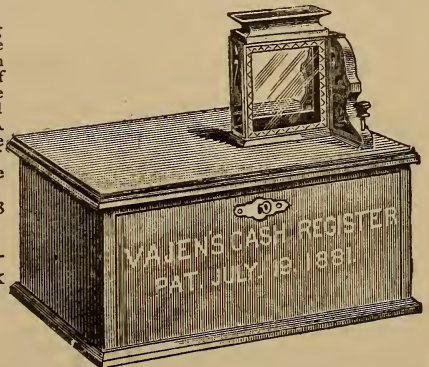

Price of Single Register, with Plate Glass, \$20.00. Double Register, like above cut, \$35.00

All cashiers having charge of the books will find, by using VAJEN'S CASH REGISTER, that the complications of the combined work are materially simplified; to such an extent, in fact, that in many instances one man can perform the duties of both book-keeper and cashier, effecting thereby the saving of one salary, as well as doing away with the necessity of using printed checks; items of no small importance in a yearly balance. A check cut from scrap paper is all that is required, upon which the number of the clerk and amount of sale is written. The price of the Register is a small consideration when compared with the expense actually saved by their use.

The Register will accommodate a check as large as $2\frac{1}{2} \times 3$ inches.

This Register is mounted on a well-finished walnut box, to set on the counter when there is not desk room, as shown in illustration.

PRICE, \$20.00.

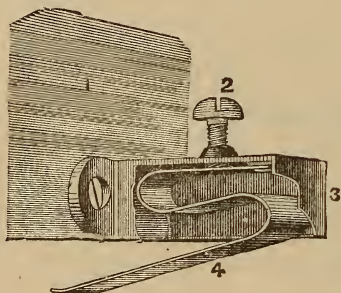

Registers can be shipped by Express or Freight. No extra charge for packing, and no discount from enclosed list.

AUTOMATIC DOOR BRAKE

Patented Sept. 4, 1883.

Prevents the Slamming of Doors, Saves
the Glass, and Gently Holds them
when Closed.

Nothing Like it Before!

Box $2\frac{1}{2}$ in. long, $1\frac{1}{4}$ in. wide, and 1 in. depth.

Directions for Automatic Brake:

- No. 1—Section of frame over top of door.
No. 2—Screw to regulate the power and hold spring in place when power is regulated to suit.
No. 3—Spring Box, with a portion cut away to show the curves of Spring.
No. 4—Spring, one end riveted to top of box, the other end to be suspended in doorway, under top jamb of door.

This Brake is also found to be important for ventilation, as it will, when desired, hold a door open from $\frac{1}{4}$ of an inch to $2\frac{1}{2}$ inches, giving gentle circulation of air from ceiling to the floor, without a disturbing current of wind.

THE SPRING AND BRAKE

Are not necessarily connected, as the Spring alone is by far the best in use. Also the Brake can be used to good advantage with other Springs or without any Spring.

Their rapid sale in New York, Boston and other Eastern cities, where they are rapidly taking the place of all other Springs, must be a guarantee of its rapid introduction all over the country.

We have room here for only one certificate from many thousand purchasers, from the well known and popular architect, Mr. Thomas R. Jackson, of 61 Broadway, New York City:

NEW YORK, March 13, 1883.

Messrs. W. A. Yoran & Co.:

Gentlemen—I cheerfully endorse and recommend Barlow's Double Acting Door Spring and Brake, which you sold me and put on my door, as being, in my opinion, the best in the market.

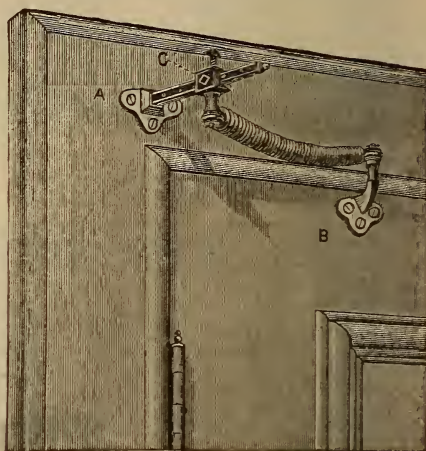

THOS. B. JACKSON.

THOS. B. JACKSON.

For Doors and Window Blinds.

Patented January 9, 1883.

This Spring holds all doors and blinds open as well as closed, is needed in summer as well as in winter, hence it sells all the year round. Made of the best quality of English steel and carefully tempered.

A—Is Scale Bar, which can be varied in its location above the door, more or less to the right or left, so the door can be made to close or be held open from any desired angle.

C—Is the Slide through which the Scale Bar passes, made fast at any desired point by use of the screw, to regulate the power of the Spring.

The power of the Spring increases as the door closes, and diminishes as it opens, till it reaches the center point, when it gently carries it back and holds the door open. This, with the Brake, when both are regulated, make the most efficient attachment ever applied to a door.

Holding door open as well as closed, adapts them for SUMMER as well as WINTER, and makes them saleable EVERY MONTH in the YEAR.

We have Springs especially adapted for Screens and Window Blinds. They prevent all rattling or slamming of Blinds, with no other fixtures to hold them open, closed or on the bow.

GEER'S PATENT SINGLE AND DOUBLE ACTING

SPRING AND BLANK BUTTS.

No Right or Left Hand. Seven
Years' Test. Unsurpassed for
Durability. Investigate
Before You Purchase.

These Spring Butts embrace a new principle, the reverse of all others, having spiral spring and toggle lever in combination, so applied that the greatest force is exerted when the door is closed. By opening the door in either direction the pressure is gradually withdrawn until door reaches the wall, in which position it is firmly held. We are the first manufacturers in America to place on the market a Double Blank Butt having no spring that will work with a double butt containing spring power. These butts are intended to be used only in combination with Geer's Butts, and when so used are the cheapest in the market, and for inside work have no equal. Their excellence have won for them a reputation among architects and builders, and placed them among the standard articles in Builders' Hardware. Circulars sent on application.

Our Spring Butts, Nos.60 to 64, and Blank Butts to match, are all solid bronze, plain finish, and are not made in ornamented patterns. We can furnish Plain Solid Bronze Butts represented in our List of Ornamented Butts, and the same list will apply.

In ordering our Solid Bronze Goods, if no particular finish is specified, the No. 1 or Light Bronze will be sent. If No. 2 Antique or Dark Bronze, or No. 3 Statuary Bronze is ordered, an additional price will be added.

SHELLABERGER'S

Combination Farm, Garden and Ornamental Fencing.

SHELLABERGER FENCE, INDIANAPOLIS, IND.

Pat. Sept. 4, 1883.

A Good, Live Agent wanted in every county to manufacture and sell the fence.

This Fence is composed of Five Two-strand Cables of the BEST Annealed Galvanized Bessemer Steel Wire, firmly interwoven with pickets of the best quality, at a uniform distance of two to three inches apart, and the diagonal supporting wires interlaced as represented in the above cut, giving an additional 1,600 lbs. to each pannel, it can not sag, keeping the pickets even and uniform on top and the lower ends up off the ground, swung, as it were, in the open air, decay is impossible. It stands without a rival, handsome, light, strong, durable and cheap. While all the advantages of wood and wire have been united in one fence, the durability and cheapness of wire has alone been maintained; to this has been added the greatest ease and rapidity of construction, and the easiest and most perfect portability of any fence in the world, made by machinery and put up in rolls from one to ten rods each.

The fence of the future will not be all wire, for this does not make a desirable fence for any kind of stock. It will not be all wood, for we haven't the material. It must then be some combination of the two. The Shellaburger Fence is the first and only perfect combination ever made, and hence is the fence of the future. We guarantee this Fence as represented, and ask those in need of fencing to call and examine same, or
